

# [How-To] Reset Uptime Kuma Password via CLI

## Purpose

This document aims to show how to reset the password for your UI user for uptime kuma via the CLI of the server it is running on.

## Prerequisites

List of prerequisites:

- Root user or sudo user
- Server running uptime Kuma

## Reset Instructions

### Step 1

Login with the root user, or login with normal user and use the follow to elevate to root:

```
sudo su -l
```

### Step 2

Run the following command to enter the Uptime Kuma docker container CLI:

```
docker exec -it uptime-kuma bash
```

### Step 3

Run the following command to access the reset tool:

```
npm run reset-password
```

Then, follow the prompts to reset and test in the UI of Uptime Kuma.
